

# SILVION™

- Gentle And Safe
- pH Balanced
- Ionic Silver Solution

## ANTIBACTERIAL SILVER SKIN & WOUND MOISTURIZER

**Prevention or resolution of microbial colonization of wounds is critical to rapid and uneventful healing. The use and misuse of antimicrobial agents continues to support the evolution of multi-drug resistant organisms that can cause severe or life-threatening infections.**

- Silvion is a revolutionary development in the arsenal of antimicrobial weapons.
- Silvion has demonstrated broad-spectrum antibacterial and antifungal activity in both *in vitro* and *in vivo* studies, with the added benefit of a mode of action that inhibits development of bacterial resistance.
- Silvion transforms commodity dressings into broad spectrum antimicrobial dressings, enhances the antimicrobial effect of advanced wound care dressings, and reduces barrier function of bio-films.

The development of bacterial resistance to antibiotics is an evolving problem in many areas of medicine. The Centers for Disease Control and Prevention estimate that MRSA accounts for greater than half of hospital-acquired staph infections, and an increasing number of Vancomycin-resistant *Enterococcus faecalis* (VRE) infections. These resistant bacteria are often referred to as "superbugs", infecting more than 94,000 people each year (2005 data) and killing almost 19,000.

Available in 2oz  
and 4oz spray bottles
